

Bash Scripting & Linux Shells

- /etc/shells, .bashrc, .profile
- Debug: bash -x script.sh
- Trap: trap 'echo Ctrl+C' SIGINT
- Logic: if/else, case
- Export vars: export VAR=value
- chmod +x script.sh

Ansible & Automation

- SSH, idempotent, repeatable
- Inventory: hosts file
- Playbook: YAML file
- Roles = reusable tasks
- CLI: ansible, ansible-playbook, ansible-doc
- ansible all -m ping
- ansible localhost -m setup
- Facts, vars, templates ({{ var }})

YAML & Playbooks

---, lists (-), dicts (key: val)

Playbook:

hosts, vars, tasks

vars_prompt for input

Indentation defines structure

Cloud & AWS

Benefits: scalable, cost-efficient

IaaS = virtual infra

Services: EC2, S3, VPC, IAM, SNS, CloudFormation

CloudFormation: template, stack, params

Storage: S3 Std, IA, Glacier Deep Archive

Tools: CodeDeploy, Terraform
