

EETS DevOps Test 2 – Open Book Printable Cheat Sheet

Condensed reference for Bash, Ansible, YAML, and AWS concepts.

1. Bash Scripting & Linux Shells

- 1 Shells: bash, sh, zsh, csh
- 2 Config files: /etc/profile, ~/.bashrc, ~/.bash_profile
- 3 Check shell: echo \$SHELL
- 4 Debug scripts: bash -x script.sh
- 5 Signals: Ctrl+C → SIGINT
- 6 Trap signals: trap 'command' SIGINT
- 7 Variables: VAR=value (shell), export VAR=value (environment)
- 8 Permissions: chmod +x script.sh
- 9 Run script: ./script.sh

2. Ansible & Automation Fundamentals

- 1 Agentless automation using SSH
- 2 Inventory: list of managed hosts
- 3 Playbook: YAML file defining tasks
- 4 Role: reusable automation structure
- 5 Module: single unit of work
- 6 Idempotency: same result after repeated runs
- 7 Facts: system information variables
- 8 Variable precedence: global → play → host → task
- 9 `ansible all -m ping` (test connectivity)
- 10 `ansible-playbook site.yml` (run playbook)
- 11 `ansible localhost -m setup` (gather facts)
- 12 Jinja2: `{{ variable }}` for dynamic configs

3. YAML Syntax & Playbooks

- 1 Start document with ---
- 2 key: value pairs
- 3 Lists use '-'
- 4 Indentation defines structure (spaces only)
- 5 Execution is top-down
- 6 vars_prompt used for runtime input

4. Cloud Computing & AWS Services

- 1 Cloud benefits: scalability, elasticity, cost efficiency
- 2 IaaS provides VMs, storage, networking
- 3 EC2: virtual servers
- 4 S3: object storage
- 5 VPC: private networking
- 6 IAM: users, roles, permissions
- 7 SNS: notifications and messaging
- 8 CloudFormation: Infrastructure as Code
- 9 Template = blueprint, Stack = deployed resources
- 10 S3 Standard (frequent), IA (infrequent), Glacier Deep Archive (archive)

5. Reading & Review Focus

- 1 AWS Intro PPT
- 2 CloudFormation PPT
- 3 Terraform PPT
- 4 Textbook Chapter 1 (pages 1–50)
- 5 Modules 4-R2 (CloudFormation), 4-R3 (Terraform)
